DATA VISUALIZATION WITH TABLEAU- 15 hours

What is Tableau?

Tableau is the powerful Data Visualization Tool. It is easily deployable and very interactive Business Intelligence Tool. It eases to get visual insight from large datasets. Creating Stories, Dashboards, Worksheets, Charts, Graphs, Plots, etc. become very easy with Tableau. This visual representation of data helps in boosting presentations and taking informed decisions based on the visual insight from the data.

Tableau's biggest asset is its Free Inbuilt Data Connectors. No license fee needs to be paid. Tableau can connect to more than 50 different data sources for free.
